Objective

Looking for an opportunity to work on Laravel or other PHP Framework along with web services and nodeJs applications.

Professional Summary

With 7+ years, on a variety of core PHP and Laravel, database driven applications, web based tools, REST APIs, back-end integration makes me an effective team player across a diverse set of projects. During these years, I have worked on numerous projects individually and also played a role of team lead.

Work Experience

★ Sr. Developer with Appster, Gurgaon

December 2015 - Present

- **Approach** (iOS)

  Approach is the only true proximity-based human interaction app for meeting singles in REAL LIFE and in the NOW, bringing the human element back to introductions via your smartphone. Approach enables singles to approach someone with confidence and have a real time chat with the connected ones.

  When you're within proximity (approx. 15-40 metres radius) of a user who has the Approach app, then their profile will appear on your carousel

  iOS: Approach

- **Work Life Calendar** (iOS and Android)

  WorkLife Calendar is a roster app that allows you to quickly and easily create any roster combination, whether recurring or one-off, and share your schedule privately with family and friends.

  iOS: Work Life Calendar   **Android:** Work Life Calendar

- **Grower's Online** (Web)

  Grower's Online offers a dynamic marketplace to connect growers and buyers through online auctions or instantaneous purchases. Web portal provide options for instant purchases and placing for bids as well.

  Web: www.growersonline.com.au

- **Blam** (iOS and Web)

  BLAM is an exciting app where people can surprise their friends about their whereabouts.

A friend can leave BLAM to be found out by other friends as the surprise when they enter in its region. BLAM also offers a great gateway for Businesses to reach to their customers with their new offers and also to monitor sort of audience they want.

iOS: [Blam](#)   **Web:** www.appblam.com
