ON SITE PROJECT

CLQ, *Myanmar*,*ProjectLead, Backend Developer (Onsite)*

This app is for Myanmar user to book a cab

to reach destination at cheaper prices.

I went on site to Myanmar for this project and

worked there for a month with client.

**Technology and
tools:**CodeIgniter, Node js,
Mysql,GIT, Postman, iOS,
Android,Google Map

OFF SITE PROJECTS

The Simpler Living(TSL), *Singapore-*TechLead,*ProjectLead, Backend Developer(Off site)*

User can upload the recipes as well as post and can make them public to all users.

Users can like,comment and follow other user same like as Instagram..

Technology and tools: Laravel, Vuejs,
Redis, Node js, GIT(AWS Code Commit),
Postman, iOS, Android.

PUB Singapore Drinks Ordering System,Singapore -Tech Lead, *Project Lead, Backend Developer (Offsite)*

An in-house project of PUB to handle the drinks

management through a system rather than manual

process. Previously all the drinks management

were handled through email and paper, so it's very

tough to handle each drinks management .

Technology and tools: Laravel, Vuejs,Docker, Intellij, GIT, Postman,Mysql.
