WORK EXPERIENCE

Startup Ai24 and Freelance laravel developer

JUN 2018 - SEPTEMBER 2019

Started a bootstrap startup to create a customer support Chatbot. We worked on nlp using GloVe Vector algorithms. And by side we consultant few startups with branding and websites. We ran out of time and resource, but after spending time with startups gave me great knowledge about startup culture and immense knowledge on conversational UI/UX

Medwiz Healthcare Pvt Ltd, Lead Laravel and Android developer

MAY 2017 -APRIL 2018

In mediwz,, I was responsible for end to end delivery of project.

- Developed the CMS in Laravel.
- Designed and developed the android app
- Worked with payment gateway in core php
- Created a patient review system in laravel.

Alvo, Android intern

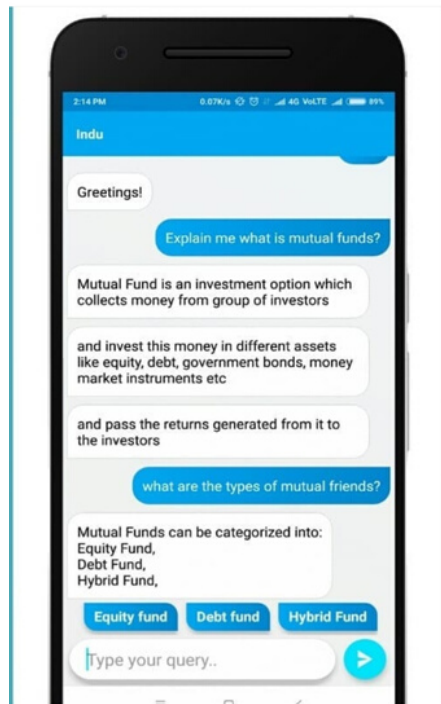

JULY 2016 - DECEMBER 2016

- Andriod app UI
- Integrating rest API to app
- Created the initial version of a app that rents wedding dresses, it has 10, 000 plus download

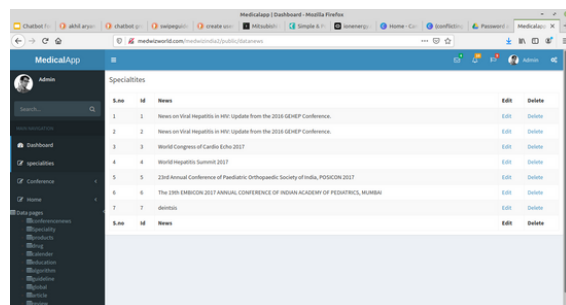

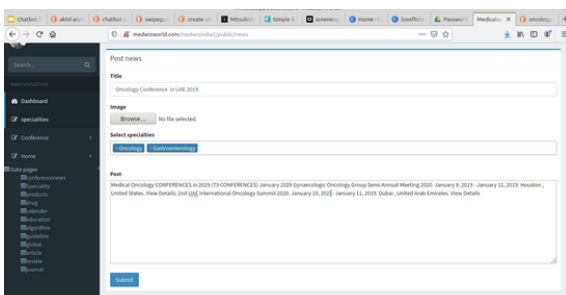

Few of my work

Medical News and Information app

chatbot using dialogflow which helps user to learn about mutual fund.

Backend developed in Laravel for apps
